

Stop Phragmites

You are invited to attend ...

Phragmites Information Meeting

Tuesday, August 30 at 7 p.m.

Large Meeting Room,
Port Franks Community Centre,
9997 Port Franks Road

Phragmites australis (common reed)

is invading ...

the riverbanks, wetlands, roadside ditches, islands and beaches
in Lambton Shores, especially in Port Franks.

But there is hope.

Phragmites control methods underway in other parts of Ontario
could work in our community.

Meeting topics:

- Locations of Phragmites in Port Franks
- Impact of Phragmites on community and ecosystem
- Options for Phragmites control
- Phragmites demonstration pilot project proposed for Autumn 2011
- Landowner experience with phragmites control
- Question and answer panel

For more information about the meeting, please call Nancy Vidler at **519-243-2562**

For information on Phragmites control visit **mnr.gov.on.ca** and search the keyword ***Phragmites***
