

Appendix C

ABCA Recession Rate Data

Appendix C – ABCA Recession Data

1.0 Recession data used to map shoreline policy zones

In total 527 transects were used to complete the mapping. Transects that intersected gullies were removed.

In the following tables the headings represent:

- **ID_N_to_S** – unique numeric transect identifier running north to south to allow sorting and other operations.
- **Subdivision** – the name of the subdivision or settlement area
- **ReachID** – the Reach ID established and described in the original Shoreline Management Plan
- **Recession Rate** – the Average Annual Recession Rate in metres/year used to map the shoreline policy zones.
- **PolicyNote** – notes/metadata on why specific rates were used
- **Recession Base** – only 2 values. 1988 means the recession rates from 1935 to 1988 were used (from original SMP). 2007 means the rates calculated by the ABCA comparing the top of the bank in 1973 and in 2007 on unprotected shorelines.

Table 1.1 – Transects 1 to 61 Recession Rates – LaVrange to Birchcliffe

ID_N_to_S	Subdivison	ReachID	Recession Rate	PolicyNote	Recession Base
1	La Vrange	1	0.079	No protection, less than 88 rate	2007
2	La Vrange	1	0.102	No protection, less than 88 rate	2007
3	La Vrange	1	0.113	No protection, less than 88 rate	2007
4	La Vrange	1	0.133	No protection, less than 88 rate	2007
5	La Vrange	1	0.133	No protection, less than 88 rate	2007
6	La Vrange	1	0.141	No protection, less than 88 rate	2007
8	Pope's Beach	1	0.137	No protection, less than 88 rate	2007
9	Pope's Beach	1	0.129	Protection visible - 2007 rates the same	1988
10	Pope's Beach	1	0.137	Protection visible - 2007 rates the same	1988
11	Pope's Beach	1	0.161	Protection visible - 2007 rates the same	1988
12	Elliott's Grove	1	0.202	No protection visible - H-95 rate is 0	2007
13	Elliott's Grove	1	0.215	No protection visible - H-95 rate is 0	2007
14	Elliott's Grove	1	0.196	No protection visible - H-95 rate is 0	2007
15	Elliott's Grove	1	0.153	No protection visible - H-95 rate is 0	2007
16	Elliott's Grove	1	0.105	No protection visible - H-95 rate is 0	2007
17	Elliott's Grove	1	0.048	No protection visible - H-95 rate is 0	2007
18	Coventry Heights	1	0.000	H-95 rate is 0	2007
19	Coventry Heights	1	0.326	Protection visible - 2007 rates similar	1988
20	Coventry Heights	1	0.289	Protection visible - 2007 rates similar	1988
21	Coventry Heights	1	0.252	Protection visible - 2007 rates similar	1988
22	Coventry Heights	1	0.298	Protection visible - 2007 rates similar	1988
23	Coventry Heights	1	0.267	Protection visible - 2007 rates similar	1988
24	Coventry Heights	1	0.254	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
25	Coventry Heights	1	0.242	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
26	Coventry Heights	1	0.276	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
27	Coventry Heights	1	0.273	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
28	Coventry Heights	1	0.192	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
29	Coventry Heights	1	0.306	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
30	Sunset Lane	1	0.223	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
31	Sunset Lane	1	0.164	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
32	Sunset Lane	1	0.202	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
33	Sunset Lane	1	0.198	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988
34	Sunset Lane	1	0.211	Protection visible - 2007 rates 1/2 to 1/3 less R-25 rate = 0.30	1988

2.0 Other rates used to verify/check

2.1 Photogrammetric x-section locations

High lake levels and erosion and flooding in the early 1970s prompted Environment Canada and the Ontario Ministry of Natural Resources to complete the Canada – Ontario Great Lakes Shore Damage Survey and Atlas. The survey and mapping covered the shoreline from Georgian Bay to Lake Ontario (EC & OMNR, 1976). Historical recession/accession rates were based on land survey data from 1900 to 1973 and “where possible edge of bluff was used as the standard reference feature” (EC & OMNR, 1975). As well photogrammetric x- sections from 1955 were compared with 1973 photogrammetric x- sections.

In 1989 F.J. Reinders and Associates completed the Lake Huron Shoreline Processes Study for four Conservation Authorities (CAs) including the Ausable Bayfield CA. This study used existing Environment Canada erosion monitoring stations from the Great Lake Shore Damage Survey (to 1973) adding the period of 1955-1988 from air photo analysis, as well as their own survey stations to establish erosion rates that were used in the processes study.

Within the ABCA cohesive bluff areas there are 25 Environment Canada stations starting with station H-95 in the north to station H-119 in the south. An additional five stations occur in the dynamic beach area of the watershed in Lambton County. These stations are represented as a line feature in the mapping system. Three Reinders and Associates stations were added to the line feature and are labeled as R-##. See Figure 2.1. and Tables 2.1 and 2.2.

Figure 2.1 Erosion Monitoring Stations – Photogrammetric x-sections

Table 2.1 – Photogrammetric x-section dataset description

FEATURE DATASET/CLASS AND TYPE			DATASET DESCRIPTION
Photogrammetric_xsections/ Photox_section_lines Line			Location of photogrammetric x-section locations established by EC/OMNR to complete the 1975 Shore Damage Survey and/or Reinders et al to complete the 'Lake Huron Shoreline Processes Study' 1989. The naming convention is H-### for the EC/OMNR stations starting with H-95 in the north and ending at H-125 in the south. Reinders stations are named R-##.

2.2 Ground survey stations

There are currently eight erosion monitoring stations within the ABCA jurisdiction, which have been ground surveyed. Five of these eight stations occur in the bluff areas. See Figure 2.2.

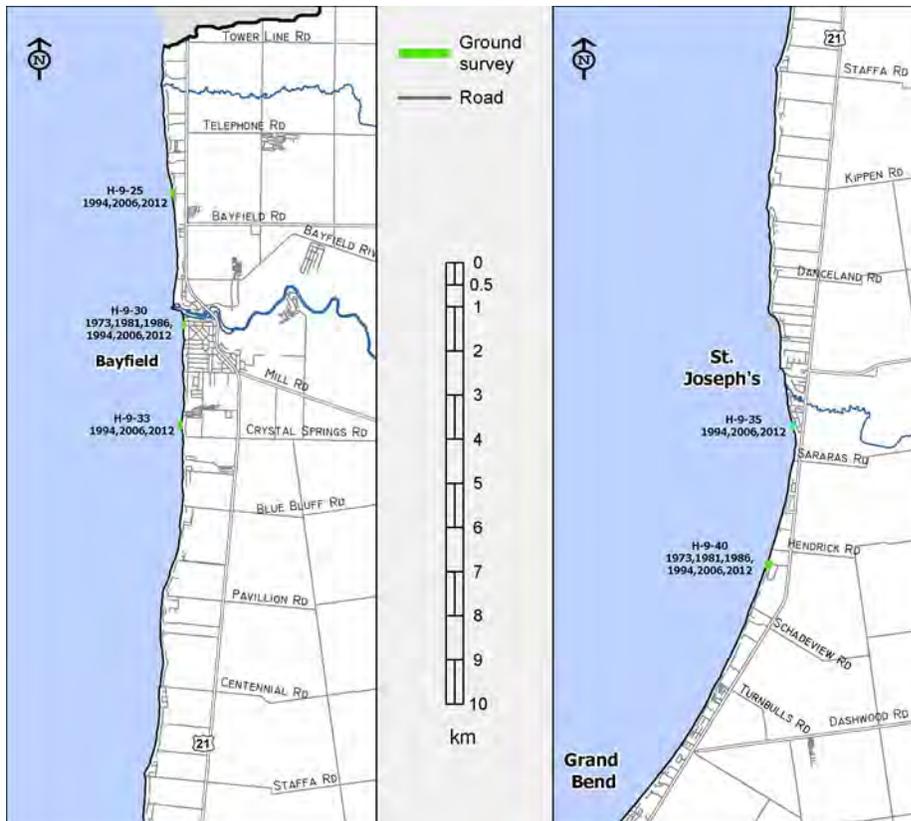

Figure 2.2 Erosion Monitoring Stations – Ground Survey with years surveyed.

These long-term shoreline monitoring ground survey locations are from the Lake Huron Shoreline Erosion Monitoring Program (LHSEM). Environment Canada (EC) and the Ontario Ministry of Natural Resources (OMNR) completed ground surveys in the 1970's and 1980's. The ABCA completed ground surveys in 1994, 2006, and 2012, at the original EC/OMNR stations adding 3 additional stations in the bluff areas of the lakeshore.

Table 2.3 Ground Survey Dataset Description

FEATURE DATASET/CLASS AND TYPE			DATASET DESCRIPTION
GroundSurveys/GroundSurveyBluffs Line			Long-term shoreline monitoring ground survey locations from the Lake Huron Shoreline Erosion Monitoring Program (LHSEM). Environment Canada (EC) and the Ontario Ministry of Natural Resources (OMNR) completed ground surveys in the 1970's and 1980's. The ABCA completed ground surveys in 1994, 2006, and 2012, at the original EC/OMNR stations adding 3 additional stations in the bluff areas of the lakeshore. Erosion rate information for four time periods (1994-2006, 1994-2012, 2006-2012, 1973-2012) are included with this dataset. All survey data was assembled in a single spreadsheet and erosion, deposition rates calculated. Additional time period rates are available for original ground survey stations.
Field Name	Field Type	Size/Decimals	Values or Description
Station	Text	10	The station ID from EC/MNRF – eg H-9-30. H is for Huron and the higher the last number the further south the station is located.
StationName	Text	30	Station name from ABCA eg. Pioneer Park.
YearSurvey	Text	40	List of the years ground surveys were completed.
Rate94_06	Double	2	The calculated erosion rate from 1994 to 2006. From ABCA LHSEM summarized data and graphs.xlsx.
Rate94_12	Double	2	The calculated erosion rate from 1994 to 2010. From ABCA LHSEM summarized data and graphs.xlsx.
Rate06_12	Double	2	The calculated erosion rate from 2006 to 2012. From ABCA LHSEM summarized data and graphs.xlsx.
Rate73_12	Double	2	The calculated erosion rate from 1973 to 2012. From ABCA LHSEM summarized data and graphs.xlsx.
Shape_Length	Double	6	Automatically created in file geodatabase – units are metres
Offshore_yrs	Text	25	List of the years offshore surveys were completed along with ground surveys.
