

FALL 2025 TREE PROGRAM

Fall is a good time to plant ball and burlap evergreens and potted deciduous trees.

Funding Available for Tree Planting Projects

Cost-share funding may be available for establishing field windbreaks, treed buffers, and other tree planting projects. The location and type of project will determine its eligibility; projects ineligible for funding are responsible for the full cost. Please contact us for more information. We are happy to help with project design and the grant application process.

Plan Now for Spring 2026!

This fall is when site preparation should be done if you plan on planting trees next spring. ABCA staff members are available to help with tree planting plans, site preparation, forest management plans and erosion control advice. Cost-share funding may be available for eligible windbreaks, buffers and reforestation projects.

Program Guidelines

1. Customers must pick up their trees at the ABCA office during scheduled pick-up times. It is the customer's responsibility to provide accurate daytime contact information for notification of pick-up dates. No refunds will be given for orders not picked up.
2. Trees purchased through this program must be used for afforestation, windbreaks, and other stewardship projects, not for landscaping.
3. The ABCA takes no responsibility for the failure of stock provided, but will take all reasonable precautions to ensure the trees are received by the customer in the best possible condition.
4. The customer agrees to protect the trees from grazing, and wildlife damage, and not to harvest or remove trees from the planted area for a minimum of 15 years after planting.
5. The customer is responsible for complying with all municipal bylaws regarding tree planting, and for arranging for locates of any buried services in the planting area.
